Kevin,

I will take the lead. I will send them an email today and CC you on it. I had to work out how to pay for everything with finance and we need them to give us one invoice with it basically split in half and then we can work out an MOU or something so that we can proceed.

-Brian

Brian –

Are you okay with acting as project lead? Since you and Duarte have some experience with ALPRs, it might be better that you take lead instead of me (which I have no clue about!). Would you like to contact Vigilant? We can both chat on the phone to schedule a date, or you can grab a few dates that work best for you and we can work it out?

Kevin

Good Morning!

Have you had a chance to follow up with Vigilant yet to potentially get the site walks scheduled and the purchasing folks involved?

Brian,

That's great to here! I have cc'd (Greg Mills from Vigilant Solutions) who is the sales representative for Vigilant. He (Greg) will just need your city's purchasing agent to work with him on the details of the Purchase Order or other methods the city handles purchasing (previous quote attached).

Greg will need to provide specifications of the size of the cement pad needed and any electrical questions to your city staff on how the electrical will run into the box. It may be useful to have the conduit and electrical run to the (2) specific sites and have the cement pad poured with electrical connections already built into the pad. I would suggest maybe a quick trip down to the site just to make sure we are all on the same page and we haven't missed anything needed for the installation. Vigilant has a technician that is local so he can easily get down there to meet with city staff doing the installation and prepping for the pad.

Remember you will also need a SIM card for the cellular lines for each device, so (2) cell lines will be needed. Do you know who the city's wireless carrier is? We usually use Verizon for most of our fixed installs and need to make sure the SIM card for the carrier would be compatible with the GX450 router that is to be used.

Here is my suggestions:

Budget person reach out to Vigilant

Check on city wireless carrier

Schedule a site walk with Vigilant, city maintenance, and ASAP

City begin pad installation

Vigilant and ASAP provide equipment and technical support in the setup

City acquire cell lines for both devices

Complete installation and test

ASAP work with Temple Station to provide alerts/training

Subject: ALPR System

John,

The cities of Bradbury and Duarte would like to move ahead with purchasing and installing two ALPR systems. Please let us know what the next steps would be to initiate the process.

-Brian
